

Baby Carriers: Keep Lil One Safe

Ensure the comfort and safety of your lil one

Avoid Fall Hazard

- Babies can fall out of carrier due to a wide leg opening.
- Adjust leg openings snugly and fit baby's legs.
- Ensure all fasteners are secure before use.
- Stay maximum aware while leaning or walking.
- No bending at waist, always bend at knees.
- Baby carrier for babies between 3.6 kgs and 18.2 kgs.

Avoid Suffocation Hazard

- Babies under 4 months can suffocate in the baby carriers if their face are pressed tight against parents' body.
- No strapping babies too tight against your body.
- Allow room for their head movement.
- Keep baby's face free

Warnings While Using Baby Carrier

- Baby must face toward till it can hold its head upright to avoid possible back or neck injury.
- Say no to the wide seat position while carrying your baby in the recommended Facing-Out position.
- Never hold hot, cold, sharp or unfriendly items in the storage pockets.
- Baby's face must be always free from any obstructions.
- Balance may be adversely affected by baby and your movement. So, Don't use a soft carrier when your balance or mobility is impaired.
- Avoid to use this carrier as a child restraint while riding a bike or motor vehicle as such types of carriers don't properly restrain your baby.
- ALWAYS ensure that all snaps, straps, buckles, and adjustments are secure before each use.
- Baby carriers are the subject to wear and tear over time.
- Check for ripped seams, torn straps or fabric and damaged fasteners before each use.
- DO NOT use this product if deterioration or problems are detected, NEVER lean against baby, NEVER place more than one child in this carrier.
- DO NOT wear more than one carrier at a time, ever.

Buckle Off Baby from the Carrier: Facing-In Position

- Keep one hand on the baby to secure then release the Buckles.
- Don't remove hand and release Side Closure Buckle of one side.
- One hand on baby inside the carrier, holding it to the chest.
- Release Side Closure Buckle from other side.
- With both hands, lift baby and place it in a safe location.
- Now gently remove the baby carrier from your body
